SURAVI CONSULTING, REMOTE PRODUCT DEVELOPMENT AND FULL STACK SOFTWARE TRAINING

SURAVI CONSULTING

SOFTWARE COMPANY

SURAVI CONSULTING

WHAT WE DO?

SOFTWARE CONSULTING

We have a team of experts who are specialized in IT consulting and also who have great experience in providing IT solutions to small, medium and corporate clients.

REMOTE PRODUCT DEVELOPMENT

We have a team of highly talented and trained professionals who can work for clients in full stack development, support and maintenance.

FULL STACK INDUSTRIAL TRAINING

We provide full stack training to talented candidates that we hire fresh from college so that they are ready to compete at a global level.

About Us

We are an experienced, innovative and dynamic team of experts at Suravi Consulting with a focus to provide software development, support and maintenance services for individuals, small- and medium-sized businesses and corporate clients.

SURAVI CONSULTING

OUR TRAINING PROGRAM

TRAINING DELIVERY METHODS

WE PROVIDE FULL STACK TRAINING TO ASPIRING CANDITATES

- Students / Interns
- Freshers looking for job
- Young engineers aspiring to be full stack engineers

- LIVE VIRTUAL CLASS ROOM

- CLASS ROOM BASED TRAINING

- BLENDED

OUR MISSION

- Conduct Training & Skills development as per the Industry need.
- Provide Full Stack development training and live project experience
- Provide overall training on technical & soft skills development

SURAVI
CONSULTING

Why Us

WHY SURAVI TRAINING IS DIFFERENT FROM OTHER?

SURAVI CONSULTING

- At SURAVI CONSULTING we have professionals 10+ years of real experience in development and testing
- We teach the students in depth about the development using different languages
- We give the students an experience of 3 months on live project
- We teach what is needed for the industry

- At other training institutes, instructor may not have the real experience of software development
- Instructor normally teaches a student on a particular language instead of required languages for full stack
- Students may not get any live project experience

Java

AWS Cloud Computing

FULL STACK DEVELOPMENT

spring BOOT | **REST API**

HANDS ON CODING

We will not just go through theory but we make you code and understand the logic.

IINDUSTRY TOPICS

As we are working employees we know what companies are expecting from you.
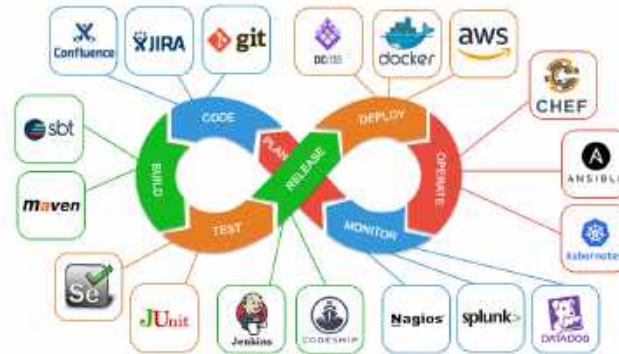

LIVE PROJECT

We give live projects where freshers can work on it and feel how companies are handling.

Fullstack development is important because industry demands a full stack developer now. Being a full stack developer even increases the chances of a student getting a job easily.

WHAT IS THE MEANING OF FULL STACK DEVELOPMENT?

- We use multiple languages for development in front end and backend
- We use Html, CSS, Javascript in the frontend
- We use Java, Spring framework, Spring MVC & Spring boot in the backend
- We use SQL, RDBMS, Message Queue for managing data

Full Stack

WHAT IS THE MEANING OF DEVOPS?

As DevOps is slowly taking over the IT landscape, leading organizations across the world have adopted DevOps methodologies to overhaul their performance, security and team dynamics. With more and more companies jumping onto the DevOps bandwagon, it has emerged as a highly sought after skill to master and hence DevOps career opportunities are thriving worldwide.

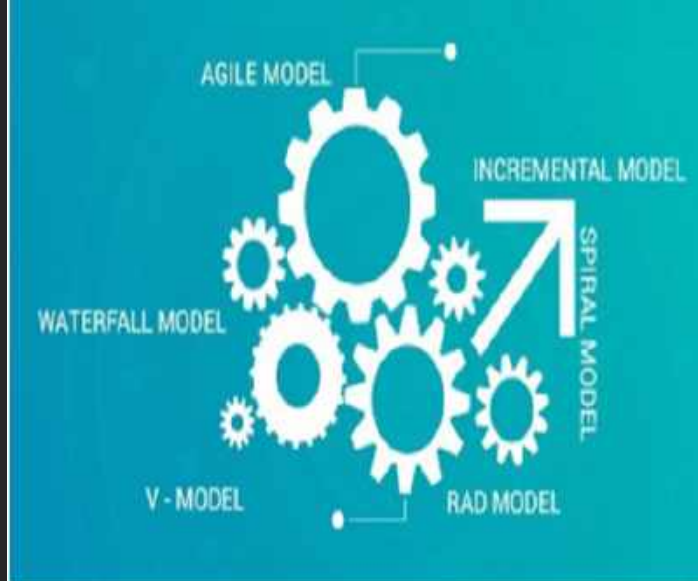

DEVOPS

- **This course is designed mainly for**
- **Fresher's**
- **Developers**
- **QA engineers**
- **Release/Deployment engineers**
- **System Admins and Operational support staff**

THERE ARE 5 THINGS BY WHICH DEVOPS IS SO POPULAR

1. Easy development cycles and faster innovations

2. Reduced failure and setbacks

3. Improved communication and collaboration

4. Increases efficiency

5. Reduces cost

This is a hands-on training program, which immerses students in the hands-on training on DevOps tools and sharing DevOps best practices about Continuous Development, Continuous Testing, Configuration Management, including Continuous Integration, Continuous Deployment, Containerization, Continuous Monitoring, Infrastructure as Code and to teach specialized skills for real-world development situations and transform you into Full Stack DevOps Engineers who are committed to Automation and Operational Excellence.

WHAT IS TEST AUTOMATION?

- AUTOMATION TESTING involves development of test script using automation tool for execution of test case
- On the contrary, manual Testing is performed by a human sitting in front of a computer carefully executing the test
- The automation software can also enter test data into the system under test, compare expected and actual results and generate the detailed test reports
- Test Automation demands considerable investments of money and resources

TEST AUTOMATION

BENEFITS OF AUTOMATION TESTING

- **70% faster than the manual testing**
- **Wider test coverage of application features**
- **Reliable in results**
- **Saves Time and Cost**
- **Human Intervention is not required while execution**
- **Better speed in executing tests**
- **Re-usable test scripts**
- **Early time to market**

Full Stack Development (Development or Testing or Devops)

	Basic	Advanced	Job Ready*
Theory & Practicals	80 hours	80 hours	80 hours
Live Project Duration	NA	1 month	3+ months
